

NGO providers, IT vendors and PRIMHD data.

The information provided below is intended as general information only about those IT vendors that are known to have an interest in providing software solutions to NGO providers that want to report PRIMHD data to the Ministry of Health. The list is not intended to constitute a complete list of IT vendors, nor should a vendor's inclusion on this list be deemed to be an endorsement by Platform Trust. NGO providers should always conduct their own process of due diligence regarding the selection of a software solution that suits their own particular circumstances (refer to the Ministry's PRIMHD vendor search and selection guide at <http://www.moh.govt.nz/moh.nsf/indexmh/primhd-ngos-software>).
